

Tying Method for the Newborn Cradle Hold

Step 1

After tying on sling (refer basic tying method), fold inner shoulder piece in half as shown. This will form a small hammock

Step 2

Place baby into folded shoulder piece, bottom first and spread the fabric to cover baby's back and bottom

Step 3

Tuck baby's legs and bottom into the other folded shoulder piece. The two folded shoulder pieces form a makeshift cradle with the baby lying across your chest

Step 4

Pull up the front flap (containing the logo). This will keep the baby firmly in place and provide extra support across the centre of your back.
